EDUCATION

- Bachelor in Technology (Computer Science (AI & ML))
- Higher Secondary – 2021
- Secondary – 2019

PSIT Kanpur | 2021 – 2025

TECHNICAL SKILLS

- Languages:** Python, JavaScript, C
- AI / LLMs:** LLM Integration, LangGraph, LangChain, Prompt Engineering, Agentic AI Workflows, Fine-Tuning, PyTorch, TensorFlow
- Backend:** FastAPI, REST APIs, Node.js, API Integration, Browser Automation
- Data & Infra:** Firebase, Firestore, SQL, Docker, Git, Self-Hosted AI Deployments

EXPERIENCE

AI/ML Developer | Coolboots Media

Nov 2025 – Present

- Developed an AI-powered outreach automation platform for personalized connection requests, follow-ups, messaging, and multi-account processing, achieving a 73.9% connection acceptance rate.
- Built a production-grade social media scraping platform (Node.js backend + Chrome extension, reverse-handshake browser-server architecture) with 5–8s profile retrieval latency, supporting 1,000+ concurrent instances.
- Developed a remote WebRTC browser platform with fingerprint management, session optimization, and anti-detection, scaling to 1,152 browser sessions/day across 100+ daily active users.
- Designed an AI decision engine and NLP/LLM pipelines for job-description summarization and automated job-application auto-fill, plus a webpage pagination-detection algorithm (~80% accuracy) to scale automation across dynamic multi-page platforms.
- Shipped AI chatbot and workflow-automation systems driving 40%+ productivity improvements across internal operations, plus customer facing dashboards for real-time visibility into scheduled content.

AI Engineer (Part-Time) | InterviewSight

Dec 2025 – Feb 2026

- Developed backend services and core AI-driven platform functionality for an interview evaluation product.
- Built an LLM-powered contradiction detection engine that generates detailed insights to improve candidate evaluation.

AI Engineer Intern | Splendid Infotech

May 2025 – Nov 2025

- Engineered an automated Meta Ads campaign tool, improving efficiency and reducing manual effort.
- Integrated an AI-powered voice calling agent with VAPI for real-time speech recognition and conversational automation; built Power BI dashboards for sales and workforce analytics.

PROJECTS

- [Pocket-buddy](#) — AI-powered expense tracker with voice input, natural-language transaction logging, multi-wallet support, and daily budget tracking.
- [Private-Chat-Extension](#) — Built a private Chrome chat extension with real-time messaging and animated UI using TypeScript, React.

CERTIFICATIONS

- Microsoft AI Engineer Associate (AI-102) – In Progress, 2026
- Object-Oriented Programming, Infosys – 2024
- Python Programming Fundamentals Infosys – 2023
